

# FORESTRY AND GIS SERVICES

Forester's Co-Op specializes in forestry, land management, and wildfire risk assessment

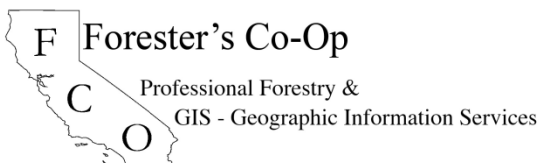

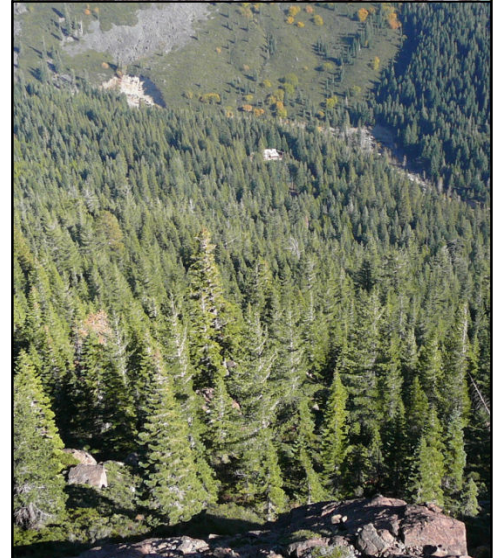

Since 1999, Forester's Co-Op has been providing professional forestry and geographic information services (GIS) throughout California. Our expertise relies on the process of field collection of relevant natural resource data and then rendering this data into a GIS platform where management scenarios can be analyzed and planned.

We excel in forest management and wildfire risk assessment modeling as well as comprehensive land management services including timber inventory, invasive weed survey, treatment, and monitoring. Quality workmanship, client confidentiality, and cost-effective solutions necessary to attain projects' objectives are cornerstone to our continued success.

## Our Consulting Specialties

- **Timber** inventory, timber harvest planning, forest health monitoring, and sustained yield planning
- Timber **value appraisal**
- Administration of CAL FIRE and Federal **cost-share programs** for resource management and **fire restoration**
- **Oak woodland** management and mitigation per CA SB1334
- **Wildfire fuels** inventory, **risk assessment**, and custom **fire behavior** modeling
- **Invasive plant** survey, treatment, long-term planning, and monitoring
- Forest **carbon sequestration** inventory and project development and verification
- **Archaeological** surveys and project mitigation reports
- **NEPA/CEQA** compliance
- Custom **GPS surveying** and related map products

With a comprehensive set of analytical skills, it is to our clients' benefit that we can adapt to meet project-specific needs. We encourage a visit to our website, [www.forco-op.com](http://www.forco-op.com), to see an expanded list of our services and examples of past projects such as timber harvest plans. We welcome any inquiries as to our services or qualifications and would be happy to discuss solutions to your project's needs.
